CONTENT • MORE QUALITY DATA

✔***Conference Proceedings Citation Index™***
ISI Proceedings is now *Conference Proceedings Citation Index* — a citation database within *Web of Science*. Discover the full influence of the latest emerging research; see who is citing proceedings findings.

1,200 new regional journals
Access thorough regional as well as global coverage, focusing on topics of local as well as international interest. More articles and more citations mean more complete research.

Scientific WebPlus
- Search the open Web for context-sensitive scientific results

✔Explore repository data — theses, technical reports, dissertations, and more from 716 repositories

✔Personalize Web results by commenting, bookmarking, and tagging websites for further reference or to share with colleagues

New 2007 data for *Journal Citation Reports®*
The most current information helps to determine a publication's impact and influence.

New links to CAB Abstracts® Plus full-text collections**
Access the full text of hard-to-find journals, conference proceedings and reports; distribution maps; and detailed descriptions and illustrations of fungi and bacteria.

More patent coverage
*Derwent Innovations Index*SM adds more extensive coverage of Canadian patents.

✔**Additional molecular biology information**
New links to National Center for Biotechnology information, directly from *ISI Web of Knowledge* searches, including full text.

✔JUST UPDATED!

DISCOVER • MAKE SEARCHING EASIER

✔**Direct links to *ISI Web of Knowledge* databases** and indexes let you start your search exactly where you want

✔**View the interface** in English or Simplified Chinese

DISCOVER • TARGET YOUR FINDINGS

Citation Mapping — Visualize citation relationships and understand the meaning of a cited reference search.

***Journal Citation Reports* enhancements:**

- Five-year impact factor — A longer time span provides more accurate trends
- Impact factor boxplots — Visualize impact factor by journal category
- Rank journals in multiple categories
- See how journal self-citations affect impact factor

Sort by Times Cited* and search for specific addresses in the all-database search.

Sort alphabetically or numerically while refining results.

Exclude results while refining or analyzing search results.

View the unique DOI number in each full record and after export to bibliographic management tools.

✔**Verify an author's affiliation** by linking a common number assigned to the author and address.

COLLABORATE • EXPORT, MANAGE AND SHARE RESEARCH

Build bibliographies, collaborate and share material easier

- Create new files in *EndNote*® and upload for use in *EndNote Web*; become an *EndNote Web* administrator at your institution. An administrative utility enables customized content delivery for online search connections, import filters and bibliographic styles.
- Share *EndNote Web* groups and designate each collaborator as "edit" or "read-only".
- Access additional content easily with links to full-text articles for journals available in *ISI Web of Knowledge*.

✔Export references found in other online databases directly to *EndNote Web*, using the new Web browser plug-in for Internet Explorer.

✔Output *Web of Science*® and Inspec® results in the BibTex format.

NETWORK • VISIBILITY OF RESEARCH EFFORTS

ResearcherID is a free, online tool for the global research community. When you register with *ResearcherID*, you are assigned a unique identification number that eliminates author misidentification.

ResearcherID participants can:

- Build custom profiles and publication lists easily by searching *Web of Science* and importing RIS files from *EndNote*, *Reference Manager*® and many other online resources.
- Track citation counts, average citations, and h-index.

Anyone using *ResearcherID* can:

- Search the registry to find citations, collaborators, speakers, editors and reviewers.
- Use the *ResearcherID* Labs environment to visually explore a registered author's citing and collaborative relationships around the world.
- Use the Badge feature to promote a registered author's most recent publications and link to their *ResearcherID* profile from almost any HTML environment — website, blog, or e-signature.

✔Search by past institutional affiliation or by joint affiliation to find authors. Sort publication lists by publication year to quickly spot the one you need.
