

Explore developing research concepts

ISI ProceedingsSM

The fastest way to search international proceedings literature

What you'll find >>

- Information about the most significant conferences, symposia, seminars, colloquia, workshops, and conventions worldwide
- Coverage of nearly 250 categories
- Nearly five million records from over 192,000 conferences since 1990
- More than 385,000 records added each year
- 73% of data from books; 27% from journal coverage
- Two editions: Science and Technology and Social Sciences & Humanities editions
- Full integration with *ISI Web of Knowledge*SM data and tools

What you can do >>

- Uncover new theories, solutions, and indications of emerging and developing concepts that help you pursue successful research and grant acquisition
- Verify citations to papers presented at conferences
- Discover research ideas as they are first presented, before they are included in journal articles
- Make acquisition decisions about proceedings
- Determine whether the proceedings of a given meeting were published and where
- Identify potential collaborators who are pursuing complementary areas of research
- Integrate searching, writing, and bibliography creation into one streamlined process

ISI Web of Knowledge homepage

Search *ISI Proceedings* with other *ISI Web of Knowledge* content, for a complete, unified search.

Refine Results

Narrow down your results using categories meaningful to your search.

Discover critical information from conferences all over the world

ISI Proceedings helps researchers access the published literature from 12,000 of the most significant conferences and scientific gatherings worldwide. It is the fastest way to search proceedings literature, and because it is available on the *ISI Web of Knowledge* platform, it is also the most efficient way to delve into emerging concepts.

Search beyond the journal literature

With over 70% of its coverage from non-journal sources, this resource lets you track emerging ideas and new research beyond what is covered in journal literature, especially in key areas such as engineering, chemistry, physics, and biology. And that makes it an ideal research companion to *Web of Science*[®], which provides access to the world's leading citation databases. Furthermore, content in *ISI Proceedings* is international, not limited to papers published in English, and includes conference papers from books, journals, reports, series, and preprints.

Analyze Results

Discover trends; identify top authors, institutions, and publications in your field.

EndNote Web

Build a bibliography and format your papers instantly.

The ISI Web of Knowledge advantage

You can simultaneously search *ISI Proceedings* with other *ISI Web of Knowledge* resources your institution subscribes to. The powerful capabilities of this premier research platform make searching, analyzing, and organizing global research data more efficient and effective. And one common vocabulary within this platform enables your search terms to be matched to all relevant terms that may be categorized differently in other databases, delivering more complete and relevant results.

Analyze Tool

Find hidden trends and patterns, gain insight into emerging fields of research, identify leading researchers, institutions, and journals, and trace the history of a particular field of study. You can analyze results by author, publication year, journal subject category, institution, language or source title, and view a numerical, percentage and graphical representation of the analysis.

Alerting and RSS feeds

Keep up to date with the information that matters to you. Save searches as email alerts and set up RSS feeds for saved searches.

EndNote® Web

Create bibliographies on the go with *EndNote Web*, fully integrated into *ISI Web of Knowledge* and freely available to any user. With *EndNote Web*, you can easily access and organize your references online as you search *ISI Web of Knowledge*, PubMed® and hundreds of library OPACs directly. You can send references to *EndNote Web* as you search, share *EndNote Web* folders with others, store references online between search sessions and transfer your files to EndNote on the desktop for further management.
